Manila, Philippines

☎ 0921 372 8542 ✉ jaraldbigno@gmail.com

PROFESSIONAL SUMMARY

Recent Bachelor of Science in Information Technology graduate with hands-on experience in web development, database management, IoT systems, and digital marketing. Skilled in developing responsive web applications using Python, JavaScript, PHP, MySQL, HTML, and CSS. Completed an internship involving website management, graphic design, and digital marketing support. Eager to contribute technical expertise, problem-solving abilities, and a strong learning mindset in an entry-level IT, Software Development, Web Development, Technical Support, or QA role.

TECHNICAL SKILLS

Programming Languages	Web Development	Database Management	Tools & Technologies
- Python (Flask, Django) - JavaScript - PHP - HTML5 - CSS - Node.js - bootstrap	- Full-Stack Web Development - Responsive Web Design - RESTful API Development - CRUD Application Development	- MySQL - SQL - MongoDB Hardware & IoT - ESP32 Development - IoT System Development - Sensor Integration - Hardware Prototyping	- N8N - AI Automation/Tools - GitHub - Visual Studio Code - Microsoft Office Suite (Word, Excel, PowerPoint) - Figma - Canva

PROFESSIONAL EXPERIENCE

Graphic Designer, Marketing Representative & Website Developer (IT Department)	Jasy Travel and Tour February 2026 – July 2026
- Designed promotional materials, digital advertisements, flyers, and social media graphics using Canva. - Developed and maintained the company website to improve online visibility and user experience. - Assisted with website updates, content management, and digital asset organization. - Supported digital marketing campaigns and branding initiatives. - Coordinated with international clients and partner organizations during business events. - Collaborated with IT and marketing teams to improve online engagement and marketing effectiveness.	

PROJECTS

Hybrid-Powered Smart Trash Bin with Auto-Lid, Fullness Detection, and Notification System
Capstone Project - Developed an IoT-enabled smart waste management system using ESP32, Python (Flask), MySQL, HTML, CSS, and JavaScript. - Built a responsive web-based administration dashboard for real-time monitoring and notification management. - Implemented automated lid operation and waste-level detection through integrated sensors. - Designed a hybrid power system utilizing solar energy, rechargeable batteries, and manual charging. - Collaborated with a development team following Software Development Life Cycle (SDLC) practices.
Smart Weather-Triggered Classroom Window System
Mini Capstone Project - Developed an IoT-enabled smart waste management system using ESP32, Python (Flask), MySQL, HTML, CSS, and JavaScript. - Built a responsive web-based administration dashboard for real-time monitoring and notification management. - Implemented automated lid operation and waste-level detection through integrated sensors. - Designed a hybrid power system utilizing solar energy, rechargeable batteries, and manual charging. - Collaborated with a development team following Software Development Life Cycle (SDLC) practices.

EDUCATION

Bachelor of Science in Information Technology	
City of Malabon University Malabon City	
Humanities and Social Sciences / K to 12	2022 – 2026
Tinajeros National High School	2020 - 2022

PROFESSIONAL SKILLS

- Problem Solving
- Analytical Thinking
- Team Collaboration
- Communication
- Adaptability
- Continuous Learning
- Time Management
- Attention to Detail
